

CLEAPSS Health & Safety for Science Technicians follow-on course

Email: science@cleapss.org.uk

Tel: 01895 251496

This three-hour (maximum) live online course is an extension of our self-study Health & Safety for science technicians course. This live online session will give participants the opportunity to raise any questions arising from the self-study course and to explore health and safety issues relevant to technicians and their jobs in more detail. There will be opportunities for participants to share good practice, raise their own concerns and work with the tutors to identify possible solutions.

To aid discussion participant numbers are limited to a maximum of 20 per session.

CLEAPSS will provide a certificate of attendance for this course.

Please note: in order to ensure you gain the maximum benefit from this training session, please do not attend without first completing the [self-study H&S course](#).

Topics covered will include:

Personal protective equipment.

Carrying out mandatory checks.

Technicians' personal risk assessment.

Lone working.

Security of labs and prep rooms.

Security of chemicals and equipment.

Observing unsafe practice – how to respond.

Introducing safer systems and procedures.

The live session will be delivered via **Zoom** so you **MUST** have access to the following in order to participate: PC/Laptop/tablet with webcam, microphone, the latest version of Zoom installed with a reliable broadband connection.

We strongly recommend you test your ability to run Zoom before the course by clicking this link:

<https://zoom.us/test>.

A link to the zoom session will be sent 24hrs in advance along with details of the breakout tasks. For easy reference please print a copy of the tasks beforehand.

Cost and dates of course: see [here](#)

Please note: cost is payable in advance.

Timings: 9.30am – 12.30pm with a 10min screen break approx. half way through the session.
