

This three and a half hour online Zoom course is suitable for technicians who are taking on/have the role of managing the chemicals in a science department. No prior chemical knowledge is assumed.

The objective of the course is to explore issues related to chemical stores and their arrangement. The course involves a mixture of presenter input, discussion and tasks. There will be opportunities for participants to share their own good practice, raise their own concerns and identify possible solutions.

Topics covered include:

- Storing and arranging chemicals
- Chemical stores – ventilation
- Labels and CLP pictograms
- Chemicals and their names
- Spill kits
- Waste, disposal and recycling
- Security of chemicals
- Ordering and receiving chemicals
- COSHH, SDS and Hazcards
- Chemical emergencies

You must have a working microphone and a webcam in order to participate in this Zoom course!

Duration: 3.5 hours
