

Safety examination of autoclaves, pressure cookers & model steam engines

Email: courses@cleapss.org.uk

Tel: 01895 251496

This course is for the person in a school who has been tasked to carry out the examination of pressure vessels under the Pressure Systems Safety Regulations (2000) as revised in 2014.

PLEASE NOTE this course will focus on models that are **not** thermostatically controlled, for example the Prestige 6L high domed pressure cooker and model steam engines manufactured by Mamod and Willesco.

If you have examples of these items please bring them along on the day* (suitable ones to bring are marked with a tick below, unsuitable ones are marked with a cross).

*Note: Attending the course will NOT in itself, constitute the statutory examination for these items.

What this course covers:

- The basics of how the pressure systems work.
- Safe operation of a range of autoclaves, pressure cookers and model steam engines.
- The legal requirements, including the employer's duty to appoint a competent person for the examination of autoclaves, pressure cookers and model steam engines.
- The meaning of 'competent person' in the context of the CLEAPSS approach to pressure system examination.
- Reviewing the written schemes of examination included in CLEAPSS document G214a.
- The management of the statutory safety examination in the school context

Duration: 1 Day

Timing: Start 9.00 am – Finish 4.00pm (approx.)
