

Health and Safety management in D&T for safety officers

Email: courses@cleapss.org.uk

Tel: 01895 251496

This course is designed for safety officers and others who may have to oversee the DT facilities in schools and colleges. The main emphasis is on management issues, risk assessment and the monitoring of H&S practice.

The course involves a mixture of presenter input, discussion and tasks. The focus will be on reducing the chances of accidents involving staff and students to a minimum;

During the course the following items will normally be covered:-

- The law and health and safety. What the law requires employers, teachers, technician and heads of department to do.
- Exploration of basic principles relating to health and safety.
- Health and safety regulations and how they affect Design and Technology.
- Requirements for D&T rooms and workshop machines in respect of health and safety.
- Organising and managing risk assessment in Design and Technology, including the customisation of model risk assessments.
- Use and maintenance of local exhaust ventilation
- Aspects of using and guarding machines in common use.

There will be ample opportunities for participants to raise questions about their own concerns.

Participants who attend the whole course will receive a CLEAPSS Certificate of Attendance.

Duration: 1 Day

Times: Start 9.00am: Finish: 4.00pm (approx.)
