

Health & Safety for Science Teachers self-study (online)

Email: courses@cleapss.org.uk

Tel: 01895 251496

This is an online self-study introductory course to health and safety for school & college science teachers. The course covers legislation and how this impacts on the management of health and safety in schools. There is a particular focus on employer's and employee's responsibilities with respect to the assessment of risk for hazardous activities undertaken by teachers in the science laboratory.

Course participants will learn how to navigate and search the CLEAPSS' website with an emphasis on how to find and use the CLEAPSS' model risk assessments relevant to the role of a science teacher.

The training consists of a series of video presentations interspersed with self-study tasks that can be completed at your own pace.

Clearly no risk assessment happened here in AI...

Aims of the course:

- To raise awareness of H&S legislation and current safety issues.
- To increase your confidence about your responsibilities.
- To help you become more aware of the full range of CLEAPSS advice and services.
- To consider risk assessments for teacher activities.
- To explore what 'managing safely' means in practice for science teachers.

Duration: You can complete this course at your own pace.

If completed all in one session it should take approximately 3-3.5 hours.
